**Vienna-Life Lebensversicherung AG Vienna Insurance Group**  
**www.vienna-life.li**  
**Call +423 235 0660 for more information**  
**Competent Authority: Liechtenstein Financial Market Authority (FMA)**

### What type of product is this?

**Type** Asset investment strategy  
**Objectives** The investment goal of a growth-oriented portfolio is to achieve substantial long-term asset growth, whereby the investor must also be willing to accept substantial price fluctuations. Returns are generated in the form of capital gains, together with interest and dividends.  
**Intended retail investors** The Client wishes to participate significantly in the potential presented by equity markets. In return, he is willing to accept substantial short-term price fluctuations.

### What are the risks and what could I get in return?

This risk indicator assumes you keep the product for at least 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less. You can cash in early. You may have to pay significant extra costs to end this contract early.

The summary risk indicator is a guide to the level of risk of this product contains compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you out. We have classified this product on a scale from 1 to 7, as 4, which is to be interpreted as higher risk. The risk of potential losses in value/price developments is classified as very high. When unfavourable market conditions would occur, it could be the case that our ability to pay you out, is limited. The developments of your investment depends on future market developments and is therefore uncertain. This product does not contain and protections, which leads to the situations that you may lose your entire investment or parts of it.

**Performance-scenarios** Investment: 10.000

	1 year	3 years	5 years

<b>Investment</b>	<b>10'000</b>	<b>10'000</b>	<b>10'000</b>

This table shows the amount of your returns in the next years, when taking different scenarios into account if you would invest 10.000. The provided scenarios show, how your investment could develop. You can compare them with the scenarios of other products. The displayed scenarios comply with an estimation of future value/ price developments which are based on historic value/ price developments; they are no exact indicator. The real amount you get is dependent on the market development and how long you keep the product. The stress scenario shows, what you would get in return in the case of extreme market conditions and does not consider the case of us not being able to pay you out. The provided numbers are all costs of the product itself. The provided numbers do not take your personal tax-situation into account, which might also possibly impact the amount of your return.

**Which costs arise?**

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs. The amounts shown here are the cumulative costs of the product itself, for three different holding periods. They include potential early exit penalties (termination deductions). The figures assume you invest 10,000. The figures are estimates and may change in the future

**Costs over time** The person selling you or advising you about this product may charge you further costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

<b>Investment 10.000</b>	If you cash in after 1 year	If you cash in after 3 years	If you cash in after 5 years
<b>Total costs</b>	<b>252.72</b>	<b>761.52</b>	<b>1'274.84</b>
Impact on retrun per year (RIY)	2.91%	2.73%	2.56%

**Composition of costs** The table below shows: the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period; the meaning of the different cost categories

**This table shows the impact on return per year**

<b>One-off costs</b>	Entry costs	0.00%	The impact of costs already included in the price. This includes the costs of distribution of your product.
	Exit costs	0.00%	The impact of costs, which occur if you either cancel or partially cancel your investment before maturity.
<b>Ongoing costs</b>	Portfolio transaction costs	0.30%	The impact of the costs of us buying and selling underlying investments for the product.
	Other ongoing costs	2.20%	The impact of the costs, which we annually deduct for investment or contract management or possibly for portfolio management.
<b>Additional costs</b>	Success fee	0.00%	This product does not contain costs such as; performance fee or and other additional costs as for example carried interests.
